THE CHILDREN’S BRAIN TUMOR TISSUE CONSORTIUM

INNOVATION
THROUGH
COLLABORATION

16 CBTTC MEMBER INSTITUTIONS

★ Children’s Hospital of Philadelphia (Operations Center)
  ● The Children’s Hospital of Pittsburgh of UPMC
  ● Seattle Children’s Hospital
  ● Ann & Robert H. Lurie Children’s Hospital of Chicago
  ● Meyer Children’s Hospital (Florence, Italy)
  ● UCSF Benioff Children’s Hospital
  ● Lucile Packard Children’s Hospital Stanford
  ● Children’s National Health System
  ● Weill Cornell Pediatric Brain & Spine Center
  ● Joseph M. Sanzari Children’s Hospital at Hackensack University Medical Center
  ● Children’s Hospital of Orange County: CHOC Children’s
  ● University of California Santa Cruz: Treehouse Childhood Cancer Initiative
  ● The Beijing Tiantan Hospital Neurosurgery Center (Beijing, China)
  ● China National Genebank (Beijing Genomics Institute - Shenzhen, China)
  ● Dayton Children’s Hospital
  ● Hudson Institute of Medical Research (Melbourne, Australia)

2,600
PATIENT SUBJECTS

CUTTING-EDGE RESEARCH

The CBTTC is transforming cancer research by using data to discover better treatments and cures for children diagnosed with pediatric brain tumors. This genomic information is housed in CAVATICA, the first ever cloud-based platform for collaboratively accessing, sharing and analyzing pediatric cancer data.

Annotated clinical and genomic data collected from high-quality brain tumor specimens is securely shared within CAVATICA, allowing researchers throughout the world to work together to find cures and better treatments for pediatric cancers. For access, visit cavatica.org.

CONNECT WITH US

At each of the Children’s Brain Tumor Tissue Consortium’s member institutions, breakthroughs are made possible through the teamwork and collaboration of doctors, researchers and patients.

The CBTTC is 100% funded by donor support and all contributions will go directly towards research.

If you would like support the Children’s Brain Tumor Tissue Consortium, please send an email to operations@cbttc.org or visit the website.
